

Module Summary

Python & Http

- **Flask** makes building APIs with Python extremely easy
- Create **endpoints** (routes) by defining a **Path** and a **Http Type**
- You can **extract values** and **return JSON, HTML, ... responses**
- Make sure to **handle error cases**, too
- **Connect any client** to the created API

Blockchain Status

- ☒ Chain of Data
- ☒ Mine new Blocks
- ☒ Block Hashing
- ☒ Analyze & Verify Chain
- ☒ Transactions
- ☒ Store Chain to Disk
- ☒ Node Network  Without Interaction (for now)
- ☐ Share Data, Resolve Conflicts
- ☒ Wallets
